

# BC Wine 2020 – Supplemental Data #5 – BC Wine 2016-2020

## SD5.1 BC wine 2016-2020

Snapshot view of how BC wine has changed over 5 years in distribution, variety (as sold) and SKU format mix. This is for all wineries including the Big 3. I don't have 2018 data so only 4 of the 5 years are shown. Note the dilutive impact of including the non-750ml formats that drops the average down from \$16.18 to \$15.90. The small numbers in pink are the standard wholesale value and YOY % change in volume.
